

# Smart Device Creations that Just Work

Whether building a single-use device from scratch or scaling a line of smart products, Mason gives you granular access to add, remove or lock down capabilities, making it possible for highly customized products to be built as envisioned.

## Say Goodbye to Your Hardware Problems

### Problems with short device lifecycles?

Mason devices have a reliable supply for 5+ years.

### Tired of managing multiple SKUs?

We engineer single SKUs with global connectivity to minimize operational headaches.

### Unpredictable security have you on edge?

We adhere to top industry standards to keep your devices safe—always.

### Frustrated with unplanned form factor changes?

No need to worry about consumer devices going end-of-life. Our hardware is designed to maximize the device lifecycle.

### Consumer focused designs not working?

Our devices are designed with features to make adapting to your use case easy.

## What Makes Mason Hardware Endless?

Informed by strategic analysis and weekly supply chain reports on 200+ components, our devices are designed to maximize the lifecycle and minimize future hardware changes. ***This lets you spend more time building features & less time managing volatile hardware infrastructure.***
